4) Issuer's Business, Products and Services

The purpose of this section is to provide a clear description of the issuer's current operations. Ensure that these descriptions are updated on the Company's Profile on www.OTCMarkets.com.

A. Summarize the issuer's business operations (If the issuer does not have current operations, state "no operations")

Generic Pharmaceutical Manufacturer

Company Overview

SOHM, Inc. (SHMN) is a pharmaceutical, cosmeceutical and nutraceutical and biotech manufacturer that produces and markets generic drugs and products for all major treatment categories. SOHM has also expanded to biotechnology with a new genome editing tool.

The Company has the following business units encompassing both OTC and Rx products.

- CDMO, Contract Development and Manufacturing Organization
- Distribution of various Pharmaceuticals (Rx and OTC), Cosmeceuticals, and Nutraceutical products
- SOHM, Inc. distributes nutraceutical and cosmeceutical products and is manufacturing them in-house.
- SOHM, Inc. Has developed its ABBIE gene editing kit and has begun distribution to customers. The kits will continue to be developed and improved based on customer feedback. We are collaborating with Coastar Therapeutics for a new gene editing cell delivery platform that includes the ABBIE system. In addition, SOHM is working its ExoSOHM and SecreSOHM lines of exosome and secretome products that harness the ABBIE gene editing technology to make cell lines that produced defined exosomes and secretomes with beneficial actives.

Generic Drug Manufacturing Expertise

SHMN's proprietary processes and formulation capability allow it to develop generic formulations of brand-names that don't infringe on valid patents relating to the brand-name product. Demand for generic pharmaceuticals is increasing as a result of increasing awareness and acceptance of generics by consumers, physicians and, pharmacists globally. In addition, government agencies and private managed care/ insurance programs encourage the substitution of generics for brand-name pharmaceuticals as a cost-savings measure. SHMN has developed the ability to bridge the gap between demand and supply for generic and OTC products cost-effectively with consistent quality deliverables.

Infrastructure To Support Manufacturing and Export

The Company's strategic manufacturing facility in Carlsbad, CA, is considered one of the safest and most suitable locations for pharmaceutical operations. The facility encompasses approximately 6,500 square feet and is licensed in compliance with Current Good Manufacturing Practice (CGMP) Regulations: Division of Manufacturing and Product Quality, as well as adherence to World Health Organization (WHO) regulations and FDA standards.

Services Provided by SHMN, and their Markets

SHMN develops and commercializes generic pharmaceuticals, utilizing its controlled-release and other in-house formulation technologies. The Company focuses on developing generic versions of brand-name products for which the patents are near expiration or expired and require proprietary formulation expertise. By innovating processes, and applied innovation, the Company's proprietary processes and formulation skills allow it to develop generic versions that replicate the brand-name products' physiological effects but don't infringe on any valid patents.

The Company actively reviews pharmaceutical patents and seeks opportunities to challenge patents it believes are either invalid or would not be infringed by a generic version. SHMN also enters into collaboration, alliances and partnerships to acquire rights to pharmaceuticals it does not own and to share development costs or resolve patent barriers to entry. Overall, the Company's generic product development strategy leverages a legal strategy predicated on non-infringement of established brand name pharmaceuticals and speed of filing and also provide applied innovation.

The Company has a manufacturing license of generic pharmaceuticals and currently produces and markets generic pharmaceutical products along with dermatology and Nutraceutical products. The classification and industry position allows for a significant increase in profit margins and scalability of manufacturing operations. This license provides SHMN the production infrastructure to operate as a corporate manufacturing hub located in India for the production and export of generic pharmaceuticals.

SHMN has recently acquired the intellectual property portfolio entitled “Cas 9 retroviral integrase and cas 9 recombinase systems for targeted incorporation of a DNA sequence into a genome of a cell or organism.” SHMN plans to continue development of the technology at the University of Arizona Center for Innovation (UACI) facilities where it is currently being developed.

CORPORATE OVERVIEW

The Company's strategic manufacturing facility in Carlsbad, CA, is considered one of the safest and most suitable locations for pharmaceutical operations. The facility encompasses approximately 6,500 square feet and is licensed in compliance with Current Good Manufacturing Practice (CGMP) Regulations: Division of Manufacturing and Product Quality, as well as adherence to World Health Organization (WHO) regulations and FDA standards.

The manufacturing facility provides complete technical support for production activities and houses the following:

- A third-party quality control laboratory equipped with instruments to provide chemical and microbiological analytical support, ensuring constant in-process checks.
- A spacious raw materials storage area featuring separate storage facilities for incoming materials, quarantine materials, released materials, and a designated section for sampling under a controlled environment, along with isolated areas for dispensing raw materials, all governed by documented Standard Operating Procedures (SOPs) for stringent control systems and checks and balances.
- A finished goods warehouse for the storage and distribution of finished products.

In addition to our Carlsbad facility, the company has secured bench space at Tech Parks Arizona in Tucson, AZ, for work on the SOHM ABBIE Genome Editing, ExoSOHM and SecreSOHM development and production. This location allows us regular interactions with the University of Arizona and the University of Arizona Center for Innovation.

Furthermore, the company has leased a property at 2501 Commercial St., San Diego, CA 92113, which is currently being modified to meet the needs of its pharmaceutical unit. The company does not incur any rent at this time, as the agreement with the landlord stipulates that rent payments will commence once the facility is fully operational. The landlord is also covering some of the modification expenses, which will be deducted from future rent payments, thereby alleviating pressure on the company's cash flow. This facility is approximately 10,500 square feet and is located in the downtown area of San Diego.

Corporate Strategy

The Company produces premium-quality, affordable pharmaceuticals and meets the changing needs of the drug market with a continual flow of new products, broadening its product portfolio, optimizing a global supply chain, helping customers more efficiently manage their inventory and customizing distribution and shipping based on specific customer needs. SHMN plans to grow by extending its leadership position in emerging generic pharmaceutical markets in Africa, Latin America, Southeast Asia and other important international markets.

Key aspects of the Company's strategy include:

- Undertake applied innovation to find an optimum fit between demand and supply gaps in the generic industry.
- Increasing generic R&D capabilities, and applied formulations with the continuous incremental improvement which adds up to sustained innovative output, and greater production capacity;
- Establishing a high level of operational effectiveness oversight and quality control systems;
- Bridge the gap between demand and supply in cost-effective generics and branded generics; Providing high-quality products in markets that are currently underserved, poorly served, or under-subscribed by existing suppliers;
- Using cost-effective, up-to-date instruments and equipment and machineries; on an ongoing basis.
- Employing advanced electronic and information technology to reduce staffing and other operational costs; providing more system-based output with minimal human errors,
- Continuing to business scanning actively seek and evaluate potential mergers, acquisitions, collaborations and other business combinations; to enlarge capacities, competencies and innovations;
- Side stepping head-to-head competition with an established business in regions that already are well served and develop alternatives for unmet needs to enlarge innovative generics portfolio.
- Establishing licensing opportunities with for SHMN newly acquired technology

Sales and Marketing

The Company's focus on 4 segments of customers who are drug wholesalers, mass merchandisers, warehousing chain drug stores, and mail-order pharmacies who have an extensive chain of retailers and loyal customer base, by doing so, SHMN does not need to re-invent its grass-root customers but rather SOHM markets its products both directly and through partner alliance agreements. SHMN focuses on fast-growing, underserved emerging markets in the Far East, Africa, newly added European Union states, and Latin America. Despite the challenges of the current economic climate, much of the world's population has a great need for basic pharmaceuticals, but these drugs are either too expensive or not available to vast populations in these regions. The Company recently expanded its generic drug distribution to address emerging pharmaceutical markets in Africa. The company also maintains an online presence for its nutraceuticals and OTC products on Amazon and Walmart Marketplace.

SOHM, INC.

NOTES TO FINANCIAL STATEMENTS December 31, 2024, and December 31, 2023

NOTE 1. OVERVIEW OF OPERATIONS AND ACCOUNTING POLICIES:

SOHM, Inc. is a generic pharmaceutical manufacturer that produces and markets generic drugs covering all major treatment categories. Global headquarters is located in North America with manufacturing sites in India. Generic pharmaceuticals are exported globally with a focus on distribution in emerging markets in Africa, Latin America, and Southeast Asia.

The accompanying financial statements have been prepared to assume that the Company will continue as a going concern. As reflected in the accompanying financial statements, the Company had negative cash flow from operations and incurred a net loss during the previous few years. The financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts or the amounts and classification of liabilities that might be necessary should the Company be unable to achieve sufficient cash flow from operations or secure adequate future financing and be therefore unable to continue as a going concern.

In the opinion of management, the accompanying balance sheets and related statements of income, cash flows, and stockholders' equity include all adjustments necessary for their fair presentation in conformity with U.S. generally accepted accounting principles. Preparing financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue, and expenses. Actual results may differ from these estimates. The information included in this Form 211-75c should be read in conjunction with Management's Discussion and Analysis and financial statements and notes thereto included. Certain reclassifications have been made for consistent presentation.

The company has acquired ABBIE patents and its technology from CGA369 Intellectual Holdings, Inc. and have made partial payment as per agreement. However, due to some avoidable circumstances, the remaining payments and issuance of stocks are pending, and the company has successfully negotiated and extended terms with CGA360 Intellectual Holding, Inc.

Revenue Recognition

The revenue recognition principle using accrual accounting requires that revenues are recognized when realized and earned—not when cash is received. The current quarter does include nominal revenue of the ABBIE kits or cell line.

Deferred Revenue

The deferred revenue shown in the balance sheet is the interest earned but not collected.

Advertising, Sales & Marketing

Advertising, sales & marketing costs are expenses as incurred. Advertising, sales & marketing expenses totaled \$ 22,913 for the year ended December 31, 2023, and for the year ended December 31, 2024, totaling \$34,866

The company implemented the new distribution of product policy, wherein distributors have been appointed and also continue to appoint new distributors and regulated sales.

Inventory

Inventory is stated at a lower of cost or net realizable value. The method used for inventory is first-in first out. Inventory consists of pharmaceutical products.

Property, Equipment, and Patents

Equipment is depreciated using the federal tax method over the estimated useful lives, which range from two to seven years.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

Earnings per Share

The basic earnings (loss) per share is calculated by dividing the Company's net income available to common shareholders by the weighted average number of common shares during the year. The diluted earnings (loss) per share is calculated by dividing the Company's net income (loss) available to common shareholders by the diluted weighted average number of shares outstanding during the year. The diluted weighted average number of shares outstanding is the basic weighted number of shares adjusted as of the first of the year for any potentially dilutive debt or equity.

The Company has no potentially dilutive securities outstanding at the end of the statement period. Therefore, the basic and diluted earnings (loss) per share are presented on the face of the statement of operations as the same number.

Stock-Based Compensation

The Company accounts for its stock-based compensation based upon provisions in SFAS No. 123, Accounting for Stock-Based Compensation. In this statement stock-based compensation is divided into two general categories, based upon who the stock receiver is, namely, employees/directors and non-employees/directors. The employee's/director's category is further divided based upon the particular stock issuance plan, namely compensatory and non-compensatory. Each of these divisions treats the stock issuance for accounting purposes in a specific manner. The employee/director's non-compensatory securities are recorded when the stock is sold at the sales price. The compensatory stock may be recorded in one of two different methods. Compensation is calculated and recorded either at the securities' fair value or intrinsic value. The Company has selected to utilize the fair value method for valuing and recording options.

NOTE 2. NOTES PAYABLE AND CAPITAL LEASE OBLIGATIONS:

Notes payable and capital lease obligations consist of the following:

There are long-term notes payable and the long-term portion.

	For Year Ended	
	12/31/2024	12/31/2023
Total Long-Term Notes and short-term notes	4,305,442	1,725,442
Total Loan Payable to Bank & Others	51,482	51,482

NOTE 3. STOCKHOLDERS' EQUITY:

Authorized Capital Stock

The Company has a total authorized capital of 3,000,000,100 shares consisting of 3,000,000,000 shares of common stock, \$.0001 par value per share, and 100 shares of preferred stock as of the date of the financial statements. Of the 3,000,000,100 shares authorized 1,998,076,407 common shares were issued and outstanding as of Dec. 31, 2024, and 1,600,576,407 shares were issued and outstanding on December 31, 2023, and of the 100 Preferred Shares authorized 60 shares were issued and outstanding on December 31, 2023, and 67 shares on December 31, 2024 respectively.

Stock-Based Compensation Paid for Services of Non-Employees

SFAS 123 provides that stock compensation paid to non-employees be recorded with a value that is based upon the fair value of the services rendered or the stock is given, whichever is more reliable. The common stock paid to non-employees was valued at the value of the stock issued. Below is a schedule that shows the common/~~preferred~~ stock issued and the value of the services rendered for each of the periods.

Year Ended	Shares Issued		Value
	Preferred	Common	
December 31, 2023	9		\$900,000
December 31, 2024	7	87,500,000	\$250,000

NOTE 4. INCOME TAXES:

The Company provides for income taxes under Statement of Financial Accounting Standards No. 109, *Accounting for Income Taxes*. SFAS No. 109 requires the use of an asset and liability approach in accounting for income taxes. Deferred tax assets and liabilities are recorded based on the differences between the financial statement and tax bases of assets and liabilities and the tax rates in effect when these differences are expected to reverse.

SFAS No. 109 requires the reduction of deferred tax assets by a valuation allowance if, based on the weight of available evidence, it is more likely than not that some or all of the deferred tax assets will not be realized. In the Company's opinion, it is uncertain whether it will generate sufficient taxable income in the future to fully utilize the net deferred tax asset. Accordingly, a valuation allowance equal to the deferred tax asset has been recorded. The total deferred tax asset is \$450,300 which is calculated by multiplying the minimum federal corporate income tax rates by the respective NOL carryforwards, (15%). The total valuation allowance is a comparable \$ 450,300.

NOTE 5. LEASES AND OTHER COMMITMENTS:

The following is a list of the operating leases that the Company had as of the period end and the monthly charges associated with those leases. The office lease is a renewable lease with the option to renew it for the next two years starting on and ending each year, for which a new option agreement to be signed 90 days in advance of the expiration date, with a 5% increase or decrease based upon the fair market value determined by the increase or decrease in the prime rate. The office equipment is on a fixed-cost lease with staggered expiration dates two years from the date of the agreement. The lease terms provide for a one-dollar buyout option at the end of the lease for which management intends on exercising, such as making the lease a capital lease. The Capital lease is depreciated over the useful life of years.

NOTE 6: GOING CONCERN:

Listed below are some of the challenges that the Company is facing, and why these raise a question as to the Company's ability to continue as a going concern. Afterward, the explanation of the "going concern" problems, management plans to turn the Company around are described.

Company's Challenges

The Company has survived by restructuring its operation and reducing its costs. The Company must continue to raise funds in the near future to survive as well as increase revenue and profitability. Management has been successful in the past in raising these funds. There is no assurance that management can continue to find investors to cover the losses generated.

The need to provide working capital adequacy is a major challenge. For sustainable expansions of manufacturing competencies, increased stringency of the regulatory framework, and need for expanded management bandwidth to capture opportunities through innovation. Their capacities and soft skills reinforce each other in face of outstanding opportunities. One of the major hurdles that are faced today is when the large-scale chain of stores evaluates the products and innovation, it demands a scale of response. The capacity builds up requires sustained adequacy on funds as well as focus and visions of business enterprise.

NOTE 7. THE EFFECT OF RECENTLY ISSUED ACCOUNTING STANDARDS:

Below is a listing of the most recent accounting standards SFAS 142-144 and their effect on the Company.

SFAS 146 Accounting for Costs Associated with Exit or Disposal Activities

This statement requires companies to recognize costs associated with exit or disposal activities, other than SFAS 143 costs, when they are incurred rather than at the date of a commitment to an exit or disposal plan. Examples of these costs are lease termination costs, employee severance costs associated with restructuring, discontinued operation, plant closing, or other exit or disposal activity. This statement is effective after December 15, 2002.

SFAS 147 Acquisitions of Certain Financial Institutions – an amendment of FASB Statement No. 72 and 144 and FASB Interpretation No. 9

This statement makes the acquisition of financial institutions come under statements 141 and 142 instead of statements 72, 144, and FASB Interpretation No. 9. This statement is applicable for acquisition on or after October 1, 2002.

SFAS 148 Accounting for Stock-Based Compensation

This Statement amends FASB Statement No. 123, Accounting for Stock-Based Compensation, to provide alternative methods of transition for a voluntary change to the fair value-based method of accounting for stock-based employee compensation. In addition, this Statement amends the disclosure requirements of Statement 123 to require prominent disclosures in both annual and interim financial statements about the method of accounting for stock-based employee compensation and the effect of the method used on reported results.

The adoption of these new Statements is not expected to have a material effect on the Company's financial position, results or operations, or cash flows.

NOTE 8. SEGMENT INFORMATION:

Segment information is presented in accordance with SFAS 131, Disclosures about Segments of an Enterprise and Related Information.
